

# BAKEWARE

## OVEN-TO-TABLE STONEWARE

Stoneware ceramic has been the cornerstone of cookware materials for centuries. Stoneware is a tried and trusted ceramic that is extremely durable and a versatile choice for convenient one-step, oven-to-table home cooking.

With our Fornax range, we wanted to create the perfect bakeware that could work in any room. It was especially important to us that it looked at home in both the kitchen and also at your dining table. The modern and stylish designs of our dishes mean that you can use them as a serving dish straight after removing from the oven. From lasagne to pies, roasted vegetables to hot crumble, use our beautiful Fornax range to cook all of your family's favourite meals.

## CARBON STEEL

Along with ceramics, carbon steel is also a perfect solution when choosing bakeware. It is lightweight, non-stick and has an amazing temperature response and exceptional heat distribution qualities ensuring a perfect bake every time! The textured base of the Norma product range gives an additional non-stick performance, allowing air to circulate under your bake, giving a crisp and even cooking result.
