PRODUCT USP'S

1. Powered by light

Short

Featuring Exeger’s groundbreaking light cell material, Powerfoyle™, use the power of light to level up your performance.

Medium

Powerfoyle™ technology enables the adidas RPT-02 SOL to transform all forms of light into battery life — allowing charging on the go without the use of cables. Let the light in and get all the playtime you need.

Long

The RPT-02 SOL headphones feature Exeger’s Powerfoyle™, a groundbreaking light cell material that converts all forms of natural and artificial light into energy. Without the use of cables, these headphones provide all the playtime you need to charge up or recharge. Use the power of light to go the distance and reach your goals.

2. Built in part from recycled plastics.*

Short

Built in part from recycled plastics*, adidas RPT-02 SOL headphones are designed to handle the toughest workouts.

*51% of the product consists of plastic of which 87% is post-consumer recycled PC-ABS and recycled nylon (excluding plastics in electronic components).

Medium

Built in part from recycled plastics*, the self-charging adidas RPT-02 SOL headphones are designed to handle the toughest workouts. Power up using your surrounding light and take your training to new levels.

*51% of the product consists of plastic of which 87% is post-consumer recycled PC-ABS and recycled nylon (excluding plastics in electronic components).

Long

Built in part from recycled plastics*, the self-charging adidas RPT-02 SOL headphones are designed to endure the everyday challenges of an active lifestyle. Made with advanced Powerfoyle™ technology that converts all forms of light into battery life, these headphones charge on the go without the need for cables. Train with peace of mind as you reconnect to your surroundings.

*51% of the product consists of plastic of which 87% is post-consumer recycled PC-ABS and recycled nylon (excluding plastics in electronic components).

PRODUCT USP'S

3. Sweat-proof and splash-proof 	Short	The IPX4-rated design is sweat-proof and splash-proof and able to handle the longest and toughest workouts.
	Medium	Sweat-proof and splash-proof design (IPX4-rated) with washable parts, the adidas RPT-02 SOL headphones are built to handle the sweat for that extra push in the gym or out on the track.
	Long	Sweat-proof and splash-proof, the adidas RPT-02 SOL's IPX4-rated design handles the sweat from your toughest workouts. Give that little bit extra in the gym or out on the track, then throw the inner headband and ear cushions in the wash and head into the next day's challenge, ready to go again.
4. 80 hours of battery life 	Short	Up to 80 hours of stored playtime when the light goes dark.
	Medium	The adidas RPT-02 SOL headphones have up to 80 hours of stored playtime when the light goes dark. With more playtime, take your performance to new levels.
	Long	With up to 80 hours of stored playtime when the light goes dark, the adidas RPT-02 SOL headphones provide even more playtime to take your performance to new levels. Worry less about battery life and focus more on your training while listening for longer.
5. Intuitive controls 	Short	Intuitive controls consisting of a light indicator and easy-to-use control jog help you to get the most out of your workout.
	Medium	Intuitive controls that maximize your performance. Control your music with ease using the control jog and find the strongest light for the best charge with the light indicator.
	Long	Improve your workout experience with the adidas RPT-02 SOL's intuitive controls. Select your favorite songs and raise the volume with ease using the unique control jog. The innovative light indicator detects the best light conditions for charging and helps you stay on the move.
